BusLink software
Data Sheet

BusLink

Preface

Dear User,

We are delighted that you have chosen a LINAK® product.

LINAK systems are high-tech products based on many years of experience in the manufacture and development of actuators, lifting columns, desk frames, electric control boxes, controls, batteries, accessories and chargers.

This document does not address the end user. It is intended as a source of information for the equipment or system manufacturer only, and it will tell you how to install, use and maintain your LINAK electronics. The manufacturer of the end product has the responsibility to provide a User Manual, where relevant safety information from this manual is passed on to the end user.

We are convinced that your LINAK product/system will give you many years of problem-free operation.

Before our products leave the factory, they undergo both function and quality testing. Should you, nevertheless, experience problems with your product/system, you are always welcome to contact your supplier.

LINAK subsidiaries and some distributors situated all over the world have authorised service centres, which are always ready to help you. Locate your local contact information on the back page.

LINAK provides a warranty on all products. (See warranty section).

This warranty, however, is subject to correct use in accordance with the specifications, maintenance being done correctly, and any repairs being carried out at a service centre, which is authorised to repair LINAK products.

Changes in installation and use of LINAK systems can affect their operation and durability. The products may only be opened by authorised personnel.

This document has been written based on the present technical knowledge. LINAK reserves the right to carry out technical modifications and keeps the associated information updated.

LINAK A/S

Terms of use

LINAK® takes great care to provide accurate and up-to-date information about its products. However, it is the responsibility of the user to determine the suitability of LINAK products for any specific application.

Due to ongoing product development, LINAK products are subject to continuous modifications and changes. LINAK reserves the right to make such modifications, updates, and changes without prior notice. For this reason, LINAK cannot guarantee the accuracy or current status of printed information about its products.

LINAK makes every effort to fulfil orders. However, due to the factors described above, LINAK cannot guarantee the availability of any particular product at any given time. LINAK also reserves the right to discontinue the sale of any product displayed on its website, in catalogues, or in other written materials issued by LINAK or its affiliated companies.

All sales are subject to the applicable terms and conditions of sale and delivery available on LINAK websites.

LINAK and the LINAK logotype are registered trademarks of LINAK A/S. All rights reserved.

BusLink software

Actuators with IC - Integrated Controller™ from LINAK® can be configured via the BusLink software.

When using the BusLink software you can easily adjust parameters like soft start/stop, virtual limits, and current limits. In the service tab you will find historic usage data, which can be used to analyse the performance of both the actuator and the application where it is installed.

Features

BusLink is divided into three areas:

- **Configuration**
  Virtual limits, current limits, speed, soft start/stop, and feedback (also possible to add/remove an actuator from a parallel system)
- **Monitoring**
  Real-time graph showing current, position, and supply voltage.
- **Service**
  Historical data, which can be exported as a PDF file for review.

Options in general

- Can be used for IC (Advanced and Parallel), CAN bus, LIN bus, and Modbus actuators.

Usage

- The BusLink software is only compatible with Microsoft Windows operating systems.

Getting started with BusLink

The BusLink software is free and available for download here:

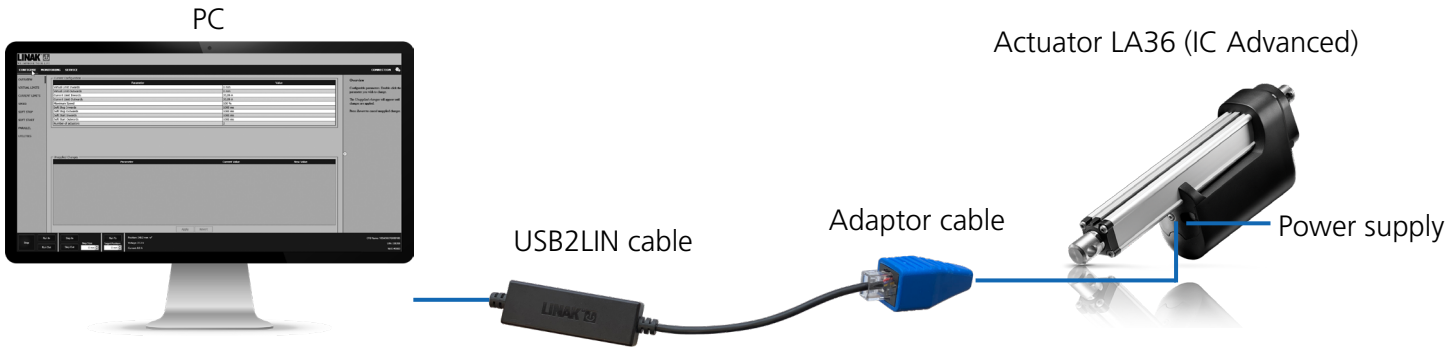

BusLink download

A BusLink cable kit is required to connect the actuator to a PC:

The kit contains 1 x USB2LIN interface cable and 1 x adaptor cable.

	LA14/LA25 IC Blue interface	**LA33/LA36/LA37** Blue interface	**LA36/LA37 Modbus** Yellow interface	**LA33/LA36/LA37 CAN bus** Green interface	**LA14/LA25 CAN bus** Green interface
