LINAK® information about REACH compliance

To LINAK customers,

LINAK supports the objectives of REACH (Registration, Evaluation, Authorisation and Restriction of Chemicals No. 1907/2006). We understand our obligations under the directive, including informing our customers if substances from the candidate list appear in our products.

Regarding the requirements of Article 33 (Candidate List) of REACH, which outlines the 'Duty to communicate information on substances in articles', LINAK constantly monitors SVHCs (the 'Candidate List of substances of very high concern for Authorisation' released by ECHA) in LINAK products. We continuously gather declarations to confirm the presence of SVHCs above 0.1% in our products. The Candidate List is available here: <http://echa.europa.eu/candidate-list-table>.

Some products made by LINAK may contain 'Substances of Very High Concern' (SVHC) above 0.1%. If technically possible and economically feasible, we substitute SVHC substances

Following the introduction of the SCIP database on 5 January 2021, LINAK products containing SVHC substances above 0.1%, and sold in the EU, have been registered in the database. Should you require information on whether a product is registered in the database, please contact chemicalcompliance@linak.com.

Regarding the requirements of REACH Article 67 (Restricted List), LINAK products do not contain any substances that conflict with the restriction conditions outlined in Annex XVII of the REACH directive.

LINAK will make all reasonable efforts to ensure appropriate and timely handling of updates in the REACH directive. Responsibilities and appropriate resources have been allocated to enable us to comply with REACH, for which reason LINAK has set up a procedure to handle and ensure REACH compliance. As part of this procedure, LINAK uses a third-party compliance database to gather information regarding REACH from its suppliers.

The information contained herein is based on REACH declarations from our sub-suppliers. We have taken all reasonable measures to ensure that the information is accurate and

reliable as of the date of publication. However, LINAK does not assume any liability for the accuracy and completeness of such information.

For more information, please contact chemicalcompliance@linak.com.

Mange hilser/ Kinds regards

Jette Jensen
