

Product introduction

OpenBus™ Power Supply for heat pads in healthcare equipment

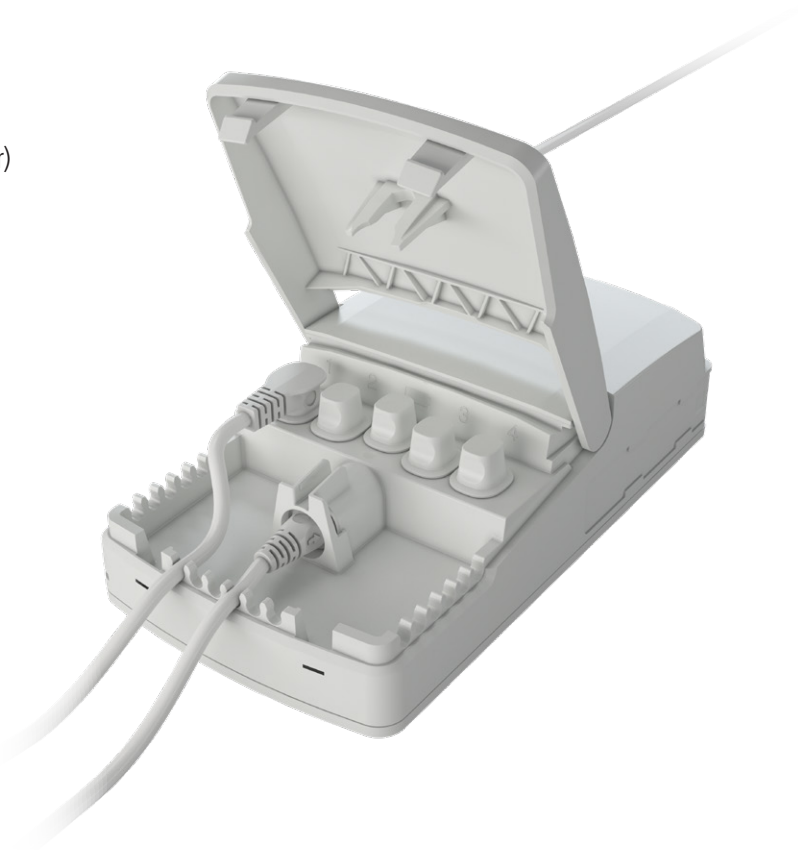

To support healthcare equipment manufacturers who wish to offer heat pads with their applications, LINAK® has developed a unique power supply unit, OPS. This 120 W OpenBus™ Power Supply makes it possible to create heat programs for different treatments, it delivers full performance for at least one hour, and it allows full control of both the application's actuator system and the heat pads solution within – all with the same LINAK® hand control.

Specifications:

- 120 W, 12 V DC, (100 % performance for 1 hour)
- IPX6 Washable DURA™
- Universal SMPS
- Overload protection (fuse)
- OpenBus™ compatibility

Compatibility:

All LINAK® OpenBus™ control boxes

Couch

Patient treatment

Operating table

Treatment chair

OPS for heat pads
