

LIFT50™

This series includes the COL50 control unit, the BAL50 battery, and the CHL50 external charger.

Experience the future of performance with our uniquely designed LIFT50. Packed with innovative features for perfect operation and maximum efficiency. Includes a high-performance, exchangeable lithium battery for extended use and flexibility without compromising high safety standard.

A smart control box with intuitive LED indicators offering data transfer via Bluetooth®.

Reliable, advanced, and ready for tomorrow's challenges.

Unique features BAL50:

- 5-year warranty
- Easy-press emergency stop
- One-hand battery release
- Reliable performance (Li-Ion)
- IPX6 washable
- Choice of colour (white or grey)
- Sealed enclosures with controlled venting for overpressure relief
- Adjacent batteries are isolated from each other to stop propagation to other cells
- Electronic protection against short circuit, overcharge, over voltage, excessive draw and under/over temperature

Unique features COL50:

- Up to 3 channels (5 channels with P32)
- OpenBus™
- Modern design
- Turbo boost function
- Bluetooth® for wireless operation and data exchange
- Customised software
- OneConnect™ – troubleshooting
- LEDs for easy battery and system status
- Choice of colour (white or grey)
- IPX6 washable
- Internal or external charger
