

Charge your devices directly from your desk

DESK2DEVICE USB CHARGER

Now you can charge devices directly from your desk, meaning one less cable and certainly less clutter.

- Elegant and sleek design
 - Works with virtually any USB device
 - Flexible mounting (c-clamp, flat/angled bases)
 - Charging indicator lights
 - No additional power outlet needed
 - High-speed charging
- Type-C - allocates up to 50 W where needed
Type-A - dedicated 7.5 W

Now you can charge devices directly from your desk

Powered by LINAK

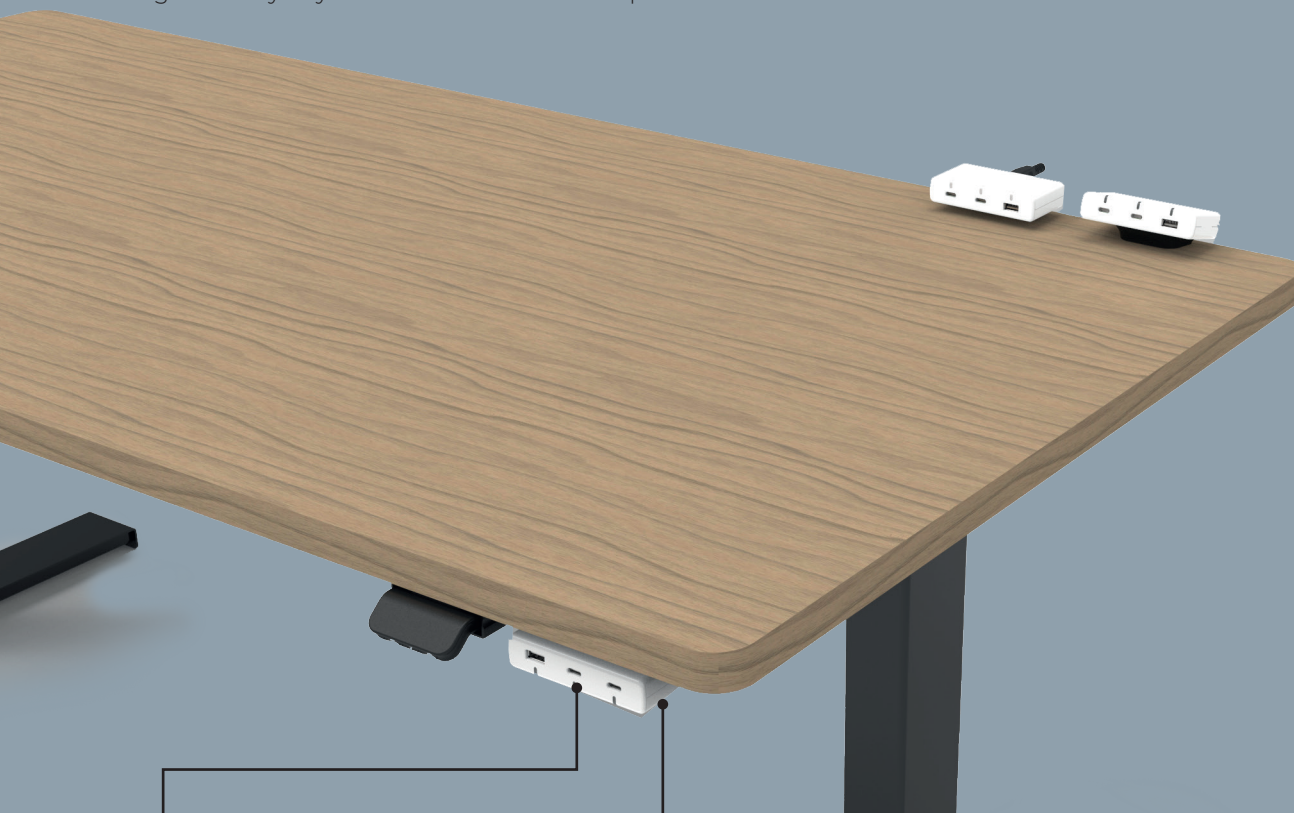

The LINAK® Desk2Device USB charger is a unique device that draws power directly from the LINAK control box. Connected to the control box by an advanced LINAK system, the device helps remove the clutter of additional power cables.

The Desk2Device USB charger comes with two smart USB Type-C ports that intelligently allocate a max of 50 W of power among the ports as needed, and a USB Type-A port with a dedicated 7.5 W of power. This allows users to charge virtually any USB device at the fastest possible rate.

Flexible Mounting

The Desk2Device USB Charger comes with two different mounts (flat and angled), and a low voltage DC-input cable that is available in different lengths, offering a variety of mounting options. Choose between a C-clamp for mounting on top of the tabletop, or screws.

This provides customers with even more design freedom or allows users the flexibility to choose the best location for their working style.
