

Product introduction

Control Box C053

To accommodate requests for a multi-channel control box with extra BUS-ports for additional functionality, LINAK® developed the C053. It is a 5-channel control box with two OpenBus™ ports allowing manufacturers of adjustable healthcare equipment, to have several movement options and two ports for an extra hand control, an attendant control (ACT/ACO), or one of the many optional LINAK® accessories.

The Control box C053 is a full member of the LINAK® CO-series. This means that it is applicable to all LINAK® actuator systems for healthcare equipment. It uses the same mounting brackets and is equally easy to install, and can be delivered the IP-rating IPX6.
