

Product introduction

LC3 - Lifting columns

LC3 2-stage and 3-stage set the standard for vertical lifting to high-end medical equipment. The LC3 moves very quietly even with substantial load. The columns offer high speed and advanced memory options to ensure easy positioning of e.g. Surgery tables and chairs, X-ray equipment and C-arms. The compact 2-stage or 3-stage are adapted for different application requirements and offer powerful lifting up to 6 kN in push and 4 kN in pull.

Improves cable management

More than 30 combinations of cables through the column – Hand control, motor cable, mains cable and earthed profile

High-end medical equipment:

Quiet. Safe. Powerful.
