

Programming Tool **Installation Guide**

Installation

1. Download the programming tool either from the link in OneConnect portal or use this link:
<https://www.linak.com/pages/tools>
2. If you have an old version of the programming tool installed (older than 3.8), please uninstall that before installing the new version. Future updates will be notified upon program start
3. Click on the programming tool file and start installation
4. Follow instructions on screen
5. When installation is finished, you may be asked to restart your computer
6. Tool tips are available when hovering your mouse over the icons

Information

To program, you will need a PB31: PB31001, a 096488-A cable (is included in the PB31 sales article) and a USB A-B cable.

Overview
