

App solutions for office desks

Activate users and improve your brand

Activate users and improve brand awareness

The number of apps for mobile devices is exploding. Users are largely embracing the trend – and so are we.

Offering a standard LINAK® Desk Control™ App, as well as a version customised **for** you, allows you to offer desk users a wealth of exciting and useful features, and places your brand within the user's line of vision – repeatedly!

Research shows that many users do not use the adjustment option in their desk. However, the very same research shows that the users actually want to – they simply forget.

That is why we have invented reminder functions, which help users to stand up and which are aligned with their goals.

To make it even more relevant and present, the LINAK® Desk Control™ App also helps provide on-the-fly statistics, allowing the user to follow his or her progress during the day and over time.
